Measuring the pulse of prosperity: An Index of Economic Freedom Analysis

1 Introduction

1.1 Overview

Data analytics is the science of analyzing raw data to make conclusions about that information. Many of the techniques and processes of data analytics have been automated into mechanical processes and algorithms that work over raw data for human consumption.

1.2 Purpose

Data analytics allow you to analyze your project issues and risks to manage them better and minimize their impact on your processes and results. This also helps you develop the right met2.PROBLEM DEFINITION & DESIGN THINKING

Reflect on the topic

Working silently and individually, have each person create a few sticky notes in all four quadrants below for about five minutes. With the remaining time, discuss notes in each quadrant.

What went well?

What should we keep doing?
What should we celebrate?
Where did we make progress?

Where
What went too
